

## About Capture The Flag Game

In this hands-on session you are going to play a role of a hacker/cracker. Goal of this attack is to take down a server. Your mission is to compromise a server in a company network, which is going to be abused as an amplifier in a DDoS attack.

The game is divided into several levels. In each level you are going to implement one action. All these actions together lead to gain a full control of the server. At the end of the game, the server is configured as an amplifier/reflector for the DDoS attack on a victim server.

## What will you learn?

- Information gathering technique.
- Unauthorized access to a web application.
- Exploitation of a system.
- DDoS attack orchestration.

## How to play the game

- Bring your own laptop.
- Open Google Chrome web browser.
- Log into KYPO – Cyber Exercise & Research Platform.
- Start, play & enjoy the game.

**Requirements:** own laptop, English keyboard layout, Google Chrome (version +38)
